Design Challenge

Mobile Application

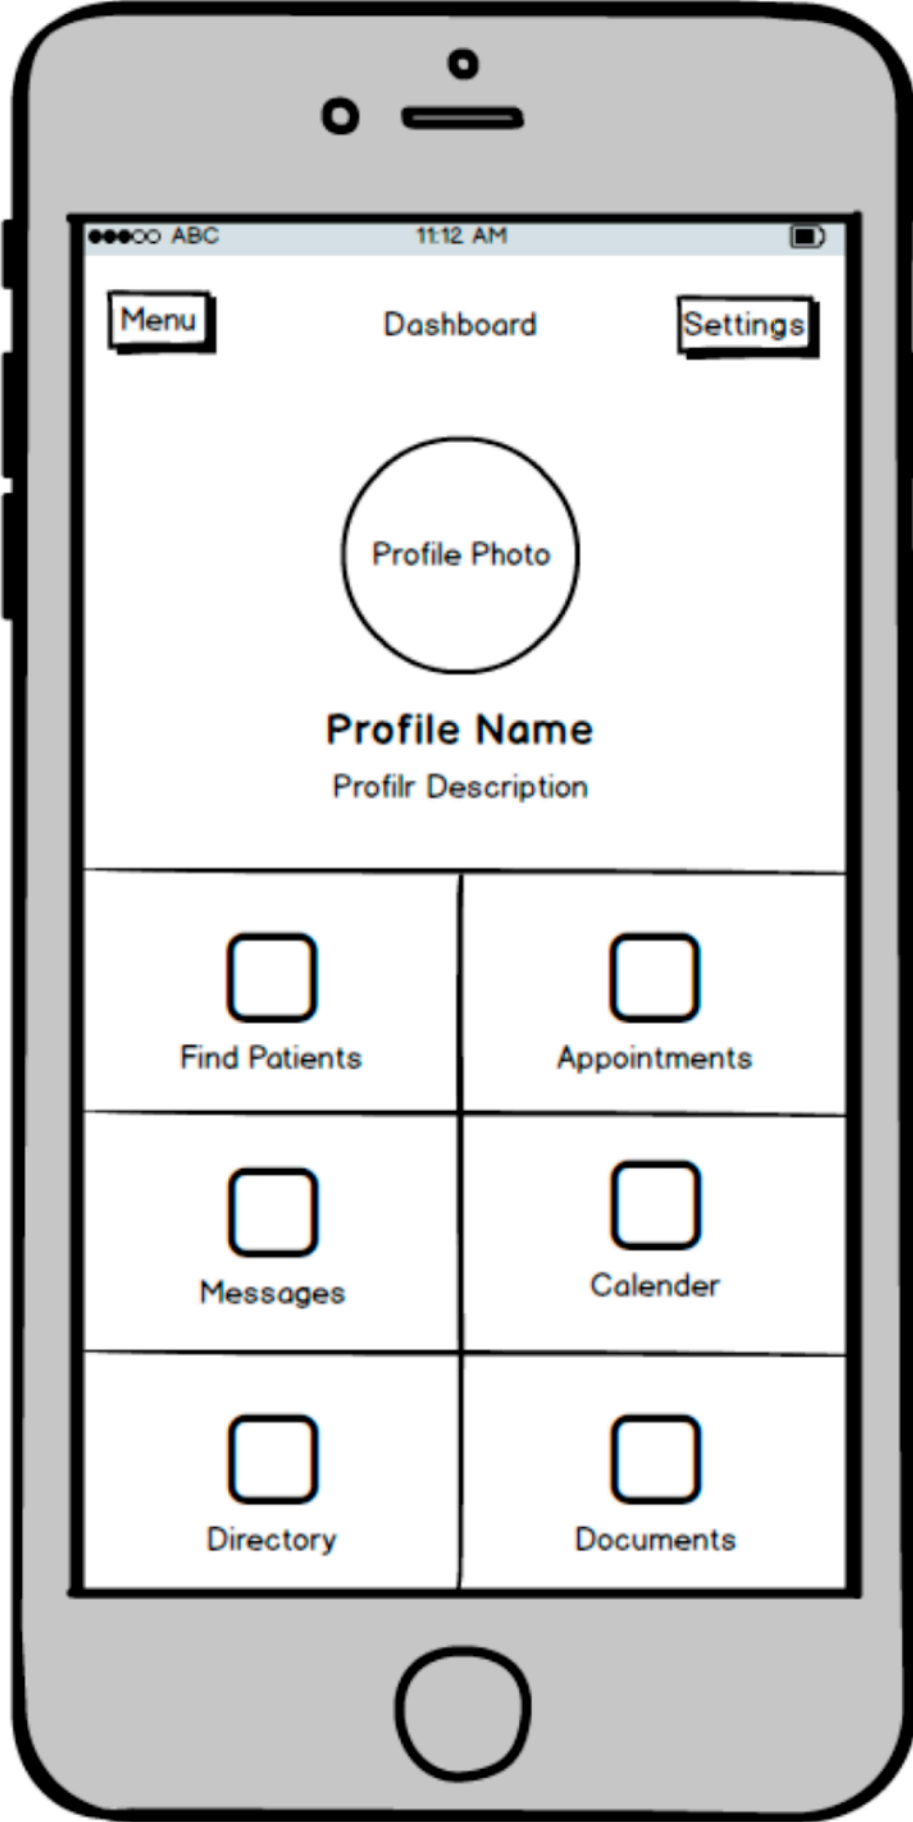

Design a mobile application using given mockups

- You have to design 5 pages using the given mockups.
 1. Login screen
 2. Dashboard/user profile
 3. Find patients
 4. Patient list
 5. Patient page
- Use your own colour theme, icons and application logo.
- Convert it to HTML and develop a working prototype. (Mobile responsive)

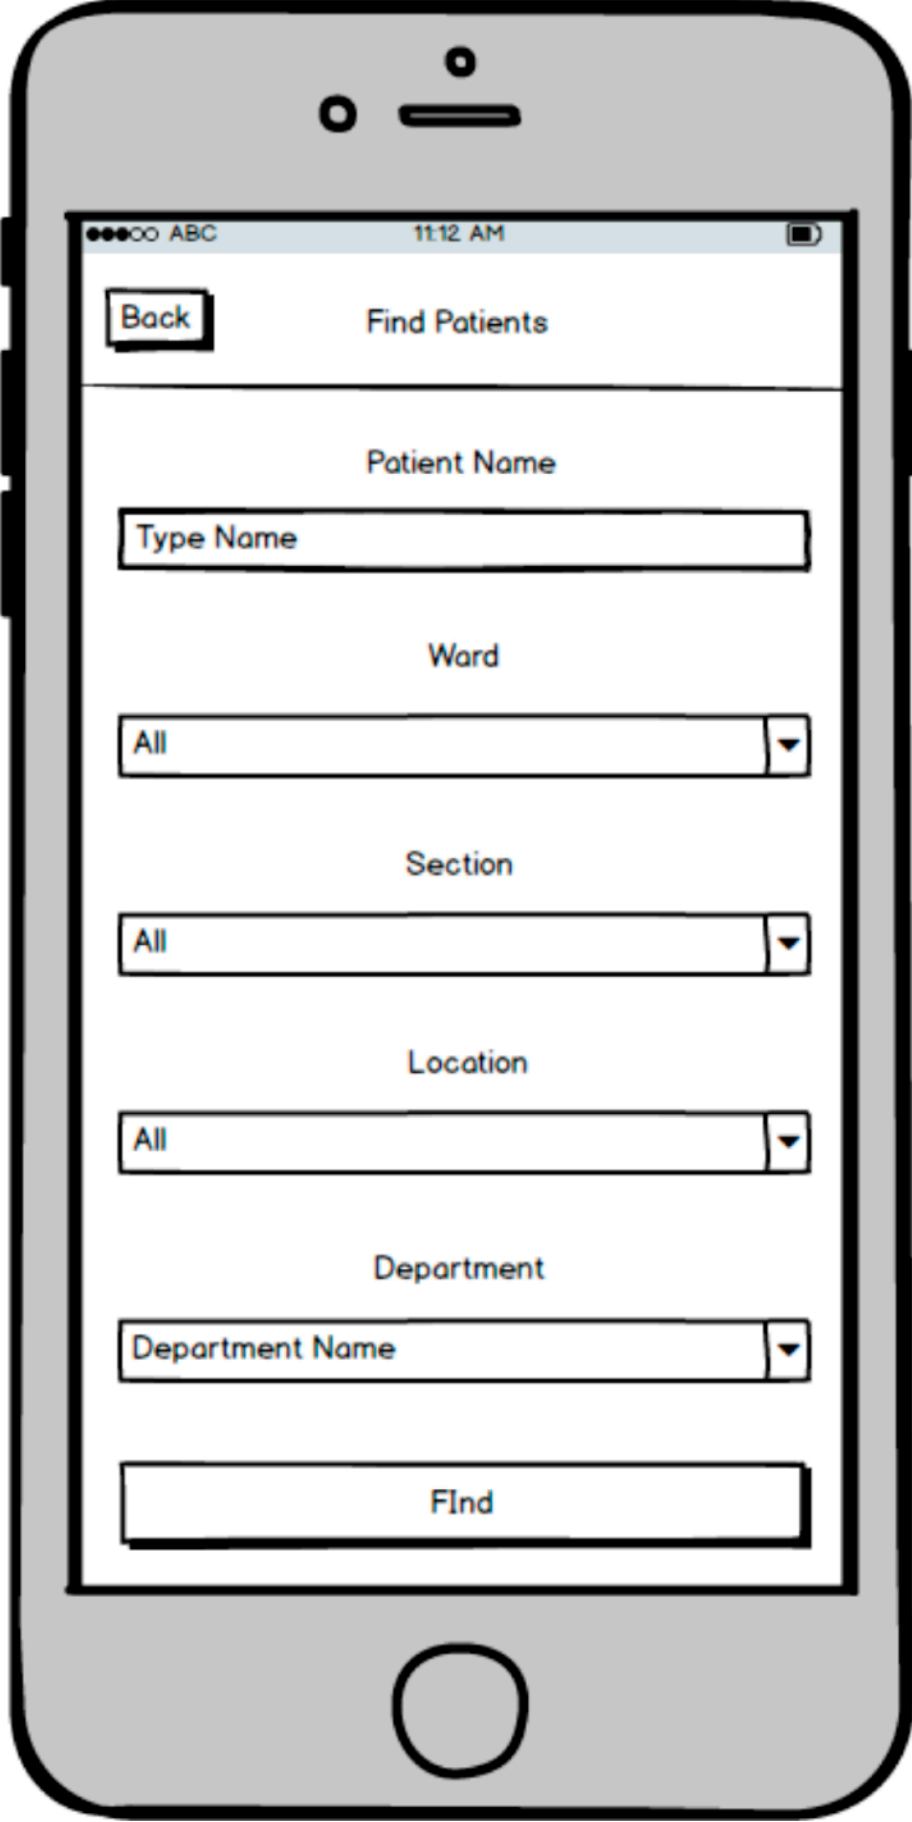

Mockups

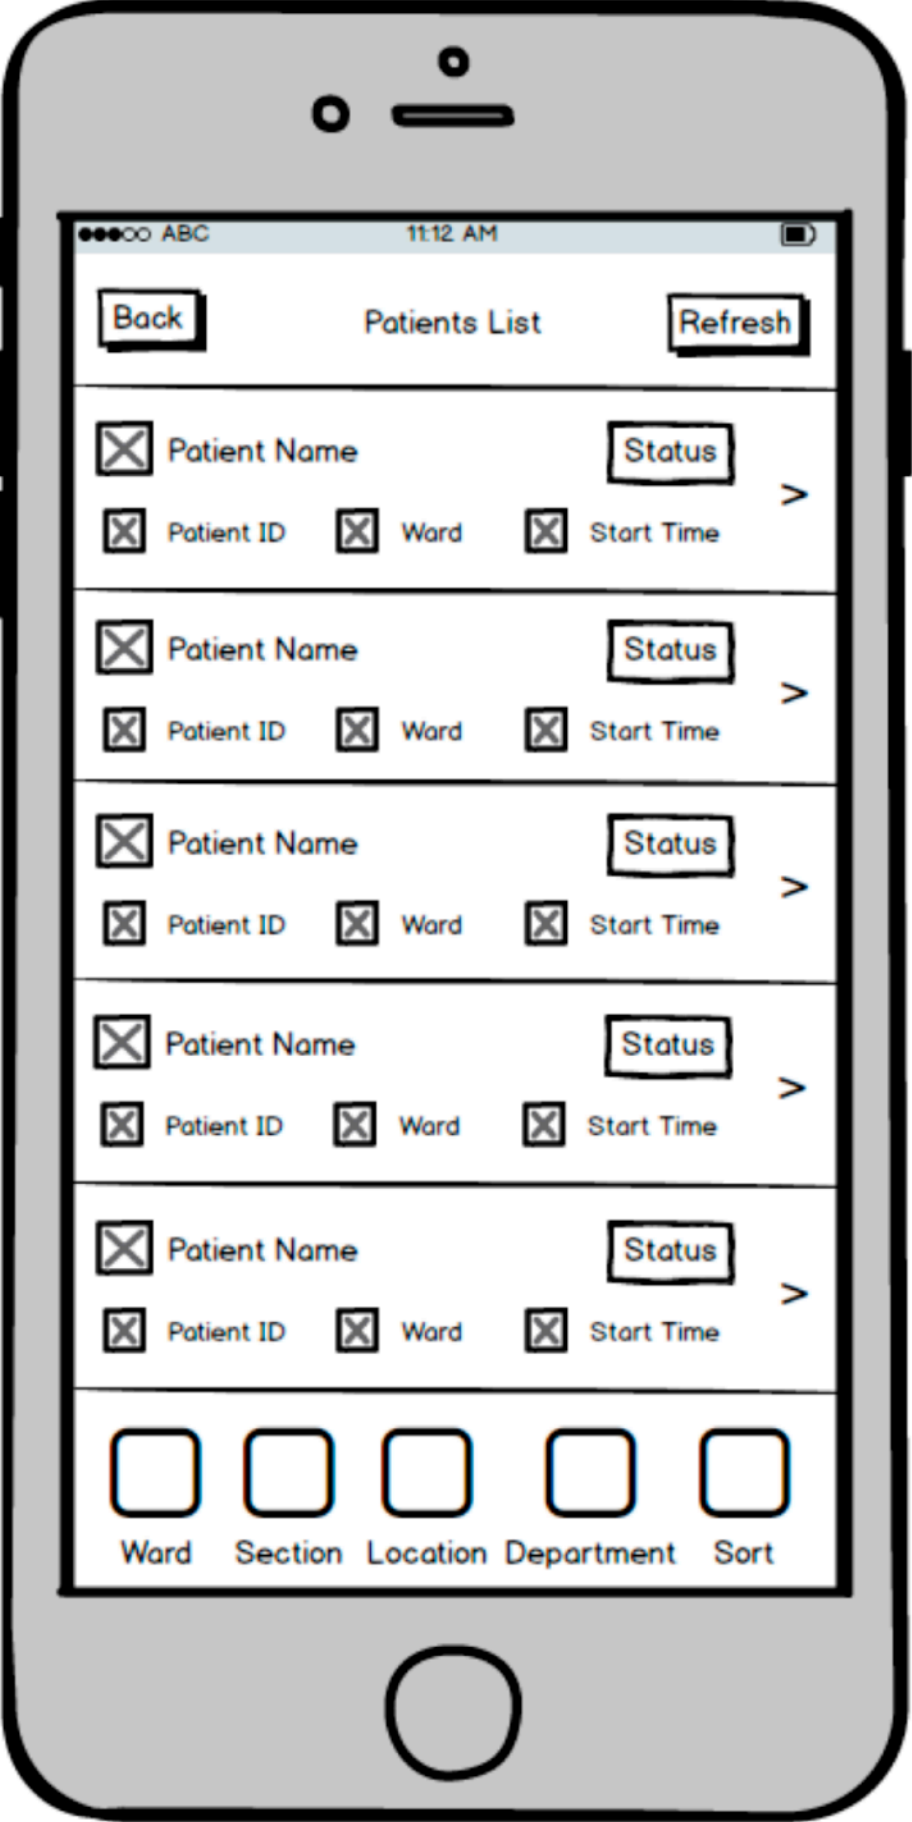

Login

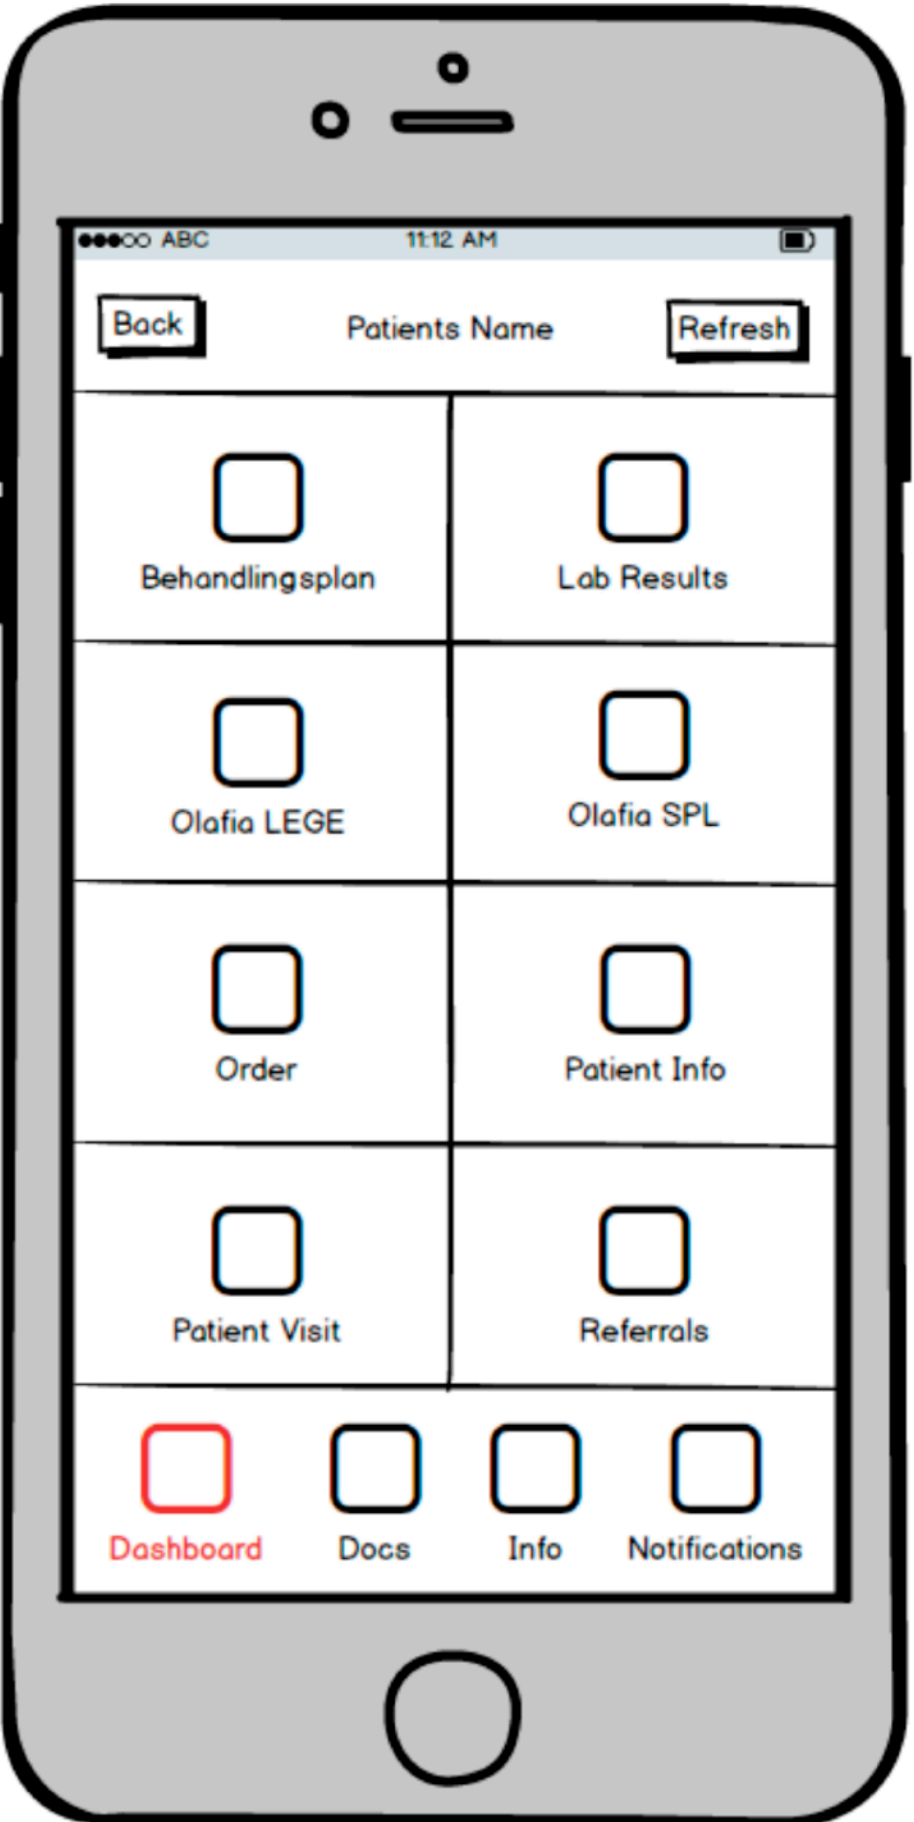

Dashboard

Find patients

Patient list

Patient page

Deliverables

- Adobe Photoshop or Adobe XD files of 5 designed pages.
- In design files, elements should be nicely arranged and named.
- HTML code as a full project to run on the browser.
- HTML pages should support mobile resolutions and perfectly suit the desktop resolution as well.
- Using a CSS compiler will give you additional advantage in collecting more marks. (LESS/SCSS)

Presentation

- We look forward to your presentation on the design challenge during the interview.

Good Luck!
